**From:** Fausta D Caballero <Dcrtnlady1@aol.com>  
**Sent:** Wednesday, February 17, 2016 6:56 PM  
**To:** Little-Web  
**Subject:** Please Reject UNS Energy's proposal

Dear Chairman Little,

I strongly urge you to reject UNS Energy's recent proposal to impose demand charges and eliminate net metering.

Demand charges are an anti-consumer billing mechanism designed to confuse ratepayers and disincentivize conservation and energy efficiency. Demand charges ambush ratepayers. You only know when your peak demand has been set after the fact. Ratepayers should be charged for the energy they use, not ambushed with exorbitant charges based on a single 15 minute period within a month.

In addition, net metering is vital to preserving the ability of ratepayers to go solar and protecting thousands of jobs. Net metering is a fair policy that creates jobs and gives consumers energy choice.

We know what happens when you eliminate fundamental solar policies. Do not let what happened in Nevada happen in Arizona.

Reject UNS Energy's proposal. It is a power grab that erodes consumer choice and control over bills in order to ensure captive ratepayers for their monopoly.

Sincerely,

Fausta D Caballero

Dear Honorable Commissioners of AZCC, Sierra Club, and Friends,

Is it true you are considering authorizing LARGE increases in my Tucson Electric Power bill ?

Is it true you are discouraging me, rather than encouraging me, to use residential solar panels and supply CLEAN solar electric energy to all my fellow residents in Tucson ?

I hope I am mistaken, I know you will defend Planet Earth from approaching ecologic disasters.

Please keep me informed about your hearings.

Many thanks for your Service to the Great State of Arizona.

Best regards

Dr. Eng. Victor Herrero-Arrieta Ph.D. M.S. Ing.Ind.

**Subject:** Docket# E-04204A-15-0142. Please Reject UNS Energy's proposal

Dear Chairman Little,

I strongly urge you to reject UNS Energy's recent proposal to impose demand charges and eliminate net metering.

Demand charges are an anti-consumer billing mechanism designed to confuse ratepayers and disincentivize conservation and energy efficiency. Demand charges ambush ratepayers. You only know when your peak demand has been set after the fact. Ratepayers should be charged for the energy they use, not ambushed with exorbitant charges based on a single 15 minute period within a month.

In addition, net metering is vital to preserving the ability of ratepayers to go solar and protecting thousands of jobs. Net metering is a fair policy that creates jobs and gives consumers energy choice.

We know what happens when you eliminate fundamental solar policies. Do not let what happened in Nevada happen in Arizona.

Reject UNS Energy's proposal. It is a power grab that erodes consumer choice and control over bills in order to ensure captive ratepayers for their monopoly.

Sincerely,

audrey ross

**Sent:** Wednesday, February 24, 2016 12:44 PM  
**To:** Little-Web  
**Subject:** ACC hearing

Doug, I'm writing a story about UniSource Energy Services' proposed rate increases that include a "mandatory demand charge" for residential customers. I was told the hearings on this will begin March 1 in Phoenix, but some public hearings are also scheduled throughout March in rural areas. Do you have a date set for Kingman or Mohave County? Also, I spoke with an AARP consultant who said these demand charges are a national trend, though there is some push back against them. Could this possibly discourage consumers from energy conservation?

Demand charges are an anti-consumer billing mechanism designed to confuse ratepayers and disincentivize conservation and energy efficiency. Demand charges ambush ratepayers. You only know when your peak demand has been set after the fact. Ratepayers should be charged for the energy they use, not ambushed with exorbitant charges based on a single 15 minute period within a month.

In addition, net metering is vital to preserving the ability of ratepayers to go solar and protecting thousands of jobs. Net metering is a fair policy that creates jobs and gives consumers energy choice.

We know what happens when you eliminate fundamental solar policies. Do not let what happened in Nevada happen in Arizona.

Reject UNS Energy's proposal. It is a power grab that erodes consumer choice and control over bills in order to ensure captive ratepayers for their monopoly.

Sincerely,

Levi Williams

**To:** Little-Web  
**Subject:** Docket# E-04204A-15-0142. Please Reject UNS Energy's proposal

Dear Chairman Little,

I am of retirement age but cannot because of the economy. Consequently every dollar counts and I have worked hard to reduce and stabilize my utility costs, which in Tucson are exceedingly high and often inexplicably raised. I purchased solar rooftop panels to help the environment for those that follow, to stabilize my costs, and to raise the value of my home so that my daughter will have something to help her when I go. Every month is tight as I cobble together enough to keep going.

If you allow utilities to operate like many ruthless corporations, you threaten not just me, but many constituents' ability to survive and reduce energy pollution.

I strongly urge you to reject UNS Energy's recent proposal to impose demand charges and eliminate net metering. This bill is an opportunity to exploit.

It seems that our country has become one where every citizen must constantly guard for predatory behavior, even from employers, businesses we patronize and even our own utilities.

Demand charges are an anti-consumer billing mechanism designed to confuse ratepayers and disincentivize conservation and energy efficiency. Demand charges ambush ratepayers. You only know when your peak demand has been set after the fact. Ratepayers should be charged for the energy they use, not ambushed with exorbitant charges based on a single 15 minute period within a month.

Arizona needs jobs! In addition, net metering is vital to preserving the ability of ratepayers to go solar and protecting thousands of jobs. Net metering is a fair policy that creates jobs and gives consumers energy choice.

We know what happens when you eliminate fundamental solar policies. Do not let what happened in Nevada happen in Arizona.

Reject UNS Energy's proposal. It is a power grab that erodes consumer choice and control over bills in order to ensure captive ratepayers for their monopoly.

Sincerely,

Janice Jarrett

**To:** Little-Web  
**Subject:** Docket# E-04204A-15-0142. Please Reject UNS Energy's proposal

Dear Chairman Little,

Please, for once, vote in favor of consumers not utility companies! We've had enough of their "forcing" us customers into unreasonable rates, etc.

It's not our fault utility companies hired people with their heads in the sand to lead them. If they had better leadership to begin with, they would have been on board with solar, wind, etc. many years ago. Just because companies like APS couldn't figure out how to tap into solar before solar companies did-- don't give them any breaks now. It's time for them to learn to work for their customers and not against them. How dare they come crying to you now wanting you to manipulate the system to cover up their faulty decision making and greedy strong arm on consumers.

It ends here. The Corp Commission has a solemn oath to protect consumers. Live up to it. The Commission has become such a black mark on Arizona that it is suffocating. It just feels as if we, the consumers and voters, are being strangled by corps. at every turn.

APS & SRP and any other utilities in AZ MUST stop controlling the Commission. Where is my voice?? Who is standing up for me and other consumers?? Where is our lobby??? I can't afford to hire a lobbying firm. I do expect the Commission to act with utmost integrity and moral compass on behalf of me and all other citizens in Arizona.

I strongly urge you to reject UNS Energy's recent proposal to impose demand charges and eliminate net metering.

Demand charges are an anti-consumer billing mechanism designed to confuse ratepayers and disincentivize conservation and energy efficiency. Demand charges ambush ratepayers.
