RE: Written Public Comment

DOCKETED BY

Arizona Corporate Commission:

Please vote against or do not approve the request to increase Renewable Energy Standard tariff. TEP has collected enough money from their customers. My most recent bill I used 379 kWh. The REST fee was \$3.03! More than the city tax of \$2.50, more than the PPFAC of \$2.58 and the same price as my ON PEAK charges (TOU)!!!

I understand TEP is required generate 15% of their energy from renewable energy by 2025 but they are ahead of the requirement. They will most likely meet the requirement before 2025.

There has to be some way they can budget better with the current surcharge they have collected from the rate payers. I think the ACC should take a close/detailed look at how much money has been collected and how it is being spent. What happens to the money that is not being used? Do they use it or lose it? Does it roll over to the next year? I think the REST budget and amount collected should be public to the rate payers to see how the money is being spent, along with all other surcharges (DSM, ECA, LFCR EE & DG).

Regards, Rate Payer
