Re: UNS proposed rate increase Docket # E-04204A-15-0142

Date: 02/22/16

The UNS proposed rate increase is regressive in at least two ways:

1. It will disproportionately affect the working class and poor.
2. It will penalize people who are helping to reduce Arizona's carbon footprint.

If passed, this rate increase will set a precedent that all other Arizona electric companies will almost certainly cite, to raise their rates as well. As a customer of TEP this will ultimately affect me directly. I am 73 and live on a fixed income. I cannot afford a rate increase... esp. such a regressive one.

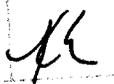

This proposal has nothing to do with a genuine need for more revenue to operate. They should be investing more into green energy... esp. solar.... not penalizing residents who have installed solar panels. This proposal simply has to do with corporate greed.

Please do your job.... regulate these corporations. Do not let them take advantage of Arizona's residents with this unnecessary, ill-advised, poorly-thought-out proposal!
