Subject: Docket# E-04204A-15-0142. Please Reject UNS Energy's proposal

Dear Chairman Little,

I strongly urge you to reject UNS Energy's recent proposal to impose demand charges and eliminate net metering.

It seems the old adage "if you have no competition you just do what you always do.. Just raise prices".

This country [if not the world] has committed itself to changing the way we use energy. Utilities like you should be more pro active and ENCOURAGE self generation. This will ultimately reduce their transmission/delivery costs ... which is what the Utilities argument is always about!!.

Demand charges are an anti-consumer billing mechanism designed to confuse ratepayers and disincentive conservation and energy efficiency. Demand charges ambush ratepayers. You only know when your peak demand has been set after the fact. Ratepayers should be charged for the energy they use, not ambushed with exorbitant charges based on a single 15 minute period within a month.

In addition, net metering is vital to preserving the ability of ratepayers to go solar and protecting thousands of jobs. Net metering is a fair policy that creates jobs and gives consumers energy choice.

We know what happens when you eliminate fundamental solar policies. Do not let what happened in Nevada happen in Arizona.

Reject UNS Energy's proposal. It is a power grab that erodes consumer choice and control over bills in order to ensure captive ratepayers for their monopoly.

Sincerely,

Peter Schumann

Demand charges are an anti-consumer billing mechanism designed to confuse ratepayers and disincentivize conservation and energy efficiency. Demand charges ambush ratepayers. You only know when your peak demand has been set after the fact. Ratepayers should be charged for the energy they use, not ambushed with exorbitant charges based on a single 15 minute period within a month.

In addition, net metering is vital to preserving the ability of ratepayers to go solar and protecting thousands of jobs. Net metering is a fair policy that creates jobs and gives consumers energy choice.

We know what happens when you eliminate fundamental solar policies. Do not let what happened in Nevada happen in Arizona.

Reject UNS Energy's proposal. It is a power grab that erodes consumer choice and control over bills in order to ensure captive ratepayers for their monopoly.

Sincerely,

Michael Wright

We know what happens when you eliminate fundamental solar policies. Do not let what happened in Nevada happen in Arizona.

Also Analog users should not be penalized with "punishment fees" either, as many analog meter-users have sensitivities to the radiation that is emitted from "smart-meters." It is the duty of the ACC to provide safe utilities to its customers; and it's not in anyone's best interests EXCEPT for UniSources and its affiliates to initiate "demand charges." APS is out-of-line as well; and it's just one more excuse to raise rates, as if they are not high enough already!

Reject UNS Energy's proposal. It is a power grab that erodes consumer choice and control over bills in order to ensure captive ratepayers for their monopoly.

Dear Chairman Little,

I strongly urge you to reject UNS Energy's recent proposal to impose demand charges and eliminate net metering.

Demand charges are an anti-consumer billing mechanism designed to confuse ratepayers and disincentivize conservation and energy efficiency. Demand charges ambush ratepayers. You only know when your peak demand has been set after the fact. Ratepayers should be charged for the energy they use, not ambushed with exorbitant charges based on a single 15 minute period within a month.

In addition, net metering is vital to preserving the ability of ratepayers to go solar and protecting thousands of jobs. Net metering is a fair policy that creates jobs and gives consumers energy choice.

We know what happens when you eliminate fundamental solar policies. Do not let what happened in Nevada happen in Arizona.

Reject UNS Energy's proposal. It is a power grab that erodes consumer choice and control over bills in order to ensure captive ratepayers for their monopoly.

Sincerely,

Jon Christine

Subject: Docket# E-04204A-15-0142. Reject UNS Energy's proposal

Dear Chairman Little,

This type of business practice reeks of "extortion" and seeks to penalize every power consumer across the board. UniSource along with APS seeks to not only raise rates, on solar customers, it also wishes to raise rates on non-solar residential customers as well. UniSource has also single-handedly PENALIZED the Solar Industry, which has resulted in higher utility bills for solar customers, along with lost jobs in the Solar Industry. This move by UniSource has personally affected a family member who WAS in the process of starting a solar company. This is a three-fold LOSING proposition for all power customers; from solar customers, to non-solar customers as well as the crushing jobs for the Solar industry! This is nothing more than an "ambush" and a "hijack" of ALL power consumers/ratepayers, and it benefits no one but UniSource, APS and other Power Companies and their affiliates. It doesn't seem to matter that there has been an economic downturn in this country, where people

are struggling to pay their already "too high" power bills. Unisource/APS only care about bilking their customers out of billions as they get richer and We The People, get poorer. This is simply OUTRAGEOUS and UNACCEPTABLE!!!

I strongly urge you to reject UNS Energy's recent proposal to impose demand charges and eliminate net metering.

Demand charges are an anti-consumer billing mechanism designed to confuse ratepayers and disincentivize conservation and energy efficiency. Demand charges ambush ratepayers. Dear Chairman Little,

Dear Commissioners,

More fraudulent, corrupt, racketeering behavior? Your continued colluding with and bowing to insane corporate greed demands, is exactly the opposite of your mandate by law to protect ratepayers from these needless assaults, is it not? To even think twice of allowing the imposition of demand metering is an insult to your very own sense of self. This makes less than zero sense for the People of Arizona.

Ratepayers should be charged for the energy they use, not punished with extortion charges based on a single 15 minute period within an entire month. Furthermore, net metering is a fair policy that encourages good practices, giving both residential and business ratepayers energy choices.

Please come to your senses and make Arizona a more friendly place to live and do business. Don't ruin it for all in the support of greed for a few. In holding to policy that makes sense you must say NO to demand metering!

Respectfully,

Stan Kingman

Subject: Docket# E-04204A-15-0142. Please Reject UNS Energy's proposal

Dear Chairman Little,

I strongly urge you to reject UNS Energy's recent proposal to impose demand charges and eliminate net metering.

Demand charges are an anti-consumer billing mechanism designed to confuse ratepayers and disincentivize conservation and energy efficiency. Demand charges ambush ratepayers. You only know when your peak demand has been set after the fact. Ratepayers should be charged for the energy they use, not ambushed with exorbitant charges based on a single 15 minute period within a month.

In addition, net metering is vital to preserving the ability of ratepayers to go solar and protecting thousands of jobs. Net metering is a fair policy that creates jobs and gives consumers energy choice.

We know what happens when you eliminate fundamental solar policies. Do not let what happened in Nevada happen in Arizona.

Reject UNS Energy's proposal. It is a power grab that erodes consumer choice and control over bills in order to ensure captive ratepayers for their monopoly.

Sincerely,

Kaye Harding

Dear Chairman Little,

Why are we, as Arizonians, with our beautiful natural state, progressive history, and strong independence leaders in solar and renewable energy? This should be Arizona's place and claim to relevance for the next hundred + years. We should be supplying the continent with energy and instead we are hostage to dirty politics funded by energy corporations. Say NO! And start driving positive change for our children, ourselves, and our future!

I strongly urge you to reject UNS Energy's recent proposal to impose demand charges and eliminate net metering.

We know what happens when you eliminate fundamental solar policies. Do not let what happened in Nevada happen in Arizona.

Reject UNS Energy's proposal. It is a power grab that erodes consumer choice and control over bills in order to ensure captive ratepayers for their monopoly.

Sincerely,

Julie Zemojtel

Dear Chairman Little,

I strongly urge you to reject UNS Energy's recent proposal to impose demand charges and eliminate net metering.

Demand charges are an anti-consumer billing mechanism designed to confuse ratepayers and disincentivize conservation and energy efficiency. Demand charges ambush ratepayers. You only know when your peak demand has been set after the fact. Ratepayers should be charged for the energy they use, not ambushed with exorbitant charges based on a single 15 minute period within a month.

In addition, net metering is vital to preserving the ability of ratepayers to go solar and protecting thousands of jobs. Net metering is a fair policy that creates jobs and gives consumers energy choice.

We know what happens when you eliminate fundamental solar policies. Do not let what happened in Nevada happen in Arizona.

Reject UNS Energy's proposal. It is a power grab that erodes consumer choice and control over bills in order to ensure captive ratepayers for their monopoly.

Sincerely,

Daisy Anderson
