I read in the paper that UniSource wants to raise our rates. A 50% increase for "Basic Service Charge" and a mandatory fee and a fee called "demand charge". So if I turn on my electric dryer and so happen the air conditioner and water heater come on at the same time my demand for less than an hour is high, then the demand charge will be very high and will be set for the entire month based on the electricity for just this one hour. That is very unfair to us who live on a limited fixed income.
