Ref: Docket Number E-04204A-15-0142

Worthy Commissioner,

I am writing this short note to advise you of my displeasure with the newest proposal of APS to increase our electric rates to cover their inadequate handling of their electric service to the people they serve. I happen to be a solar customer and someone who is on a fixed budget. We as a country should be trying to do everything we can to stop the reliance on other countries for their energy products. Because I saw fit to purchase solar electricity I feel that APS should not punish me and charge me more money for it just because they did not have the foresight to do it themselves. I live in a community that has over 1000 homes with solar and it is getting larger as we speak. This can only help the country and we have plenty of sunshine at no cost inviting more people to get solar. If APS thinks that they will wait until the smaller companies get their approvals to increase the rates and then they will apply for theirs due to prior acceptance by the board they are in for one hell of a fight. APS had made over \$400 million last year and their investors received almost \$300 million of that. How much profit does a company need? It is just greed and the common people are sick of it. Please help us in our stand against APS and vote down their arrogant rate hike.

Thank you so much for your time and effort in this very important matter.

Sincerely Yours,

Kenneth J. Kurtz
