Nature Of Opinion

Docket Number: E-01933A-15-0322

I feel it is utterly ridiculous to raise rates on people whom are trying their best to limit energy consumption, costs and emmissions. My husband and I try to exist on social security because my husband suffered permanent nerve damage from a surgical injury. None the less we have tried to do our part to help reduce power generation emmissions, so we installed a Solar Photovoltaic system on our roof. NowTEP gets bought by a foreign company that could care less about their consumers, our air, our water or anything else accept their profit margin which is obviously huge already. our State Government has rejected any form of emmissions controls and even use of cleaner fuel for power generation, makingthis . . . increase ridiculous from any point of view!

We request that you please reject this increase outright. Any new lines for new customers/locations are paid for bythose customers. Repair of existing lines and equipment is already figured in the pricing as is; This.is simply outright greed on TEP's parent company's part.
