Nature Of Opinion

Docket Number: E-01461A-15-0363 Docket Position: Against

To the elected commissioners who serve on the board of the Arizona Corporation Commission, I am writing to express my extreme opposition in Trico's proposed changes to net metering and interconnection fees for customers seeking solar power. There is no arguing the fact that green energy is smart energy. The availability of solar power to the general population has grown exponentially in the past several years. This green energy is beneficial to the greater environmental good. By approving Trico's proposal to increase fees it would prohibit many individuals from gaining access to renewable energy sources and continue the monopoly in the Trico service area. Both Trico and TEP limit their service areas, leaving no other options but pursuing environmentally friendly options such as solar. Arizona should be leading the solar energy industry with our perpetually sunny days. It would be a shame for the commissioners to allow this to happen. The Arizona Corporation commission should be looking out for the people of Arizona, not large corporations with deep pockets I hope you take my, and other similar opinions, opposing Trico's proposal for a rate hike and changes to net metering, into consideration when making your decision. Thank you, Stephanie Drew
