AZ CORP COMMISSION  
DOCKET CONTROL

Greetings:

Utilities want to keep their monopoly hold on energy distribution.

I can't band together with neighbors to create our own grid. We are constrained against selling pv solar we generate to anyone except the so-called "grid providers."

There's not a general two-way street and they really don't want one. Watch them scream at that suggestion.

Legal blah-blah aside, they're for-profit now, using in large part infrastrutcre created by the community for community benefit.
