Re: UNS Electric Rate Case Docket # E- 04204A-15-0142

Dear Commissioners:

I am a strong advocate of rooftop solar. I am opposed to a reduction in the reimbursement rate for rooftop solar customers, and other changes that will reduce the incentive for rooftop solar. I would encourage the Commission to consider the large value that rooftop solar provides to all utility customers:

- 1) The costs to address global warming will be high in the future for all utilities. Rooftop solar displaces oil-based electric production, reducing costs for the utility to meet future renewable energy goals.
- 2) Rooftop solar lowers capital costs for all utility customers. When the utility builds solar farms, capital costs are paid for by all customers. With rooftop solar these capital costs are paid by the individual homeowner, reducing costs to other customers.

Thank you for your consideration.
