Regarding; UNS Rate Case Docket #E-04204A-15-0142

RECEIVED

Dear Chairman Little and Members of the ACC:

2016 APR -8 P 3: 46

AZ CORP COMMISSION  
DOCKET CONTROL

My wife and I are retirees living in Green Valley, AZ. In 2010 we invested a significant amount of our retirement savings to have solar panels installed on our roof. The panels have been performing well and in a few more years our savings will have paid for the panels. We look forward to then having the savings to help pay living expenses as inflation erodes our fixed income pension funds further.

I hope you will consider people such as us in your deliberations of the "net metering" issue. We would like to see no change in our contract with TEP as far as the rate for selling back unused power that we generate. TEP has already raised the fixed surcharge that we pay each month regardless of power usage. We also incur periodic charges to have our solar panel cleaned. Thank you for your consideration of our situation.

Sincerely,	1731 North Oak Hill Lane
Roger Oravetz	Green Valley, Arizona, 885614
