Docket # E-04204A-15-0142

Dear Chairman Little and Members of the Arizona Corporation Commission:

I, like many other solar energy users have invested considerable of our own money in solar power generation for our homes. In my case, after rebates and tax credits, I invested over \$22,000 in my solar array. I generate an excess of electric power from my 15KW system. As I am reimbursed less for the excess energy I produce than TEP charges its other customers for that energy, in essence, I am subsidizing TEP.

Further, as a State, Arizona has an unparalleled opportunity to be a national leader in clean, affordable energy and with that accomplishment, a strong incentive for many large energy using businesses to re-locate to our State. The Arizona Corporation Commission by endorsing and supporting the proliferation of solar energy availability in Arizona can be instrumental in assuring our future economic growth.

Sincerely,

Dennis Winsten
