Regarding: UNS Electric Rate Case Docket #E-04204A-15-0142

Dear Chairman Little and Members of the ACC;

Since we have gone to the expense of installing solar panels over two years ago, we have still paid TEP \$14.92/month for service and taxes, despite not using one kilowatt-hour from that company. They have received an enormous amount of energy from us, benefitting our neighbors who are not able to afford the financial outlay that we had. The city and state has had less gas and coal consumption because of our efforts, and the environment has benefitted. The proposal that we have had a "free ride", despite paying our fair share and generating more than our share in energy for TEP is ludicrous. Those allegations are being made by a 20<sup>th</sup> century company and its shareholders who (25 yrs ago) did not have the foresight and imagination to understand that our dependence on gas and coal was expensive, limited, polluting, and could easily be replaced by an infinite energy source. Not the fault of those of us who propose to avoid all those problems! We invite the ACC to join the 21<sup>st</sup> century and promote sun power and wind power for the benefit of the economy and ecology of Arizona.

Sincerely,

Jane Heaton, MD

Peter Ryers, MD
