DOCKET CONTROL

Docket No. E-01933A-15-0239

To the Commissioners:

I write urging the Corporation Commission to reject Tucson Electric's proposal to change the way they credit solar power production by individual homeowners through the 2016 Renewable Energy Standard & Tariff (REST).

For decades, Tucson Electric customers have remained dependent on this monopoly to do the right thing and switch to renewable energy.

Instead, TEP has persisted in burning coal, poisoning the residents of Tucson's South side. Only the quota imposed by the Corporation Commission led them to begin a switch to renewables, and even then until recently they have met the mandate only by relying on individual homeowners and institutions to generate solar power.

Only when the EPA stepped in did TEP contemplate switching from coal to natural gas-another fossil fuel generating greenhouse gases and other pollutants.

Tucson Electric customers have installed rooftop solar in an effort to at least partially free ourselves from dependence on the irresponsibility of this monopoly.

Rather than raise the price per kWh which would encouraged customers to conserve, Tucson Electric appear to want to reinforce their monopoly by hiking service charges and fees, removing any benefit from individual investment in solar power.

**E-01933A-15-0239**

**Arizona Corporation Commission  
Utilities Complaint Form**

Raising the service charge to \$20 per month, which I understand is the intention, will almost completely wipe out the benefit of the investment individual users such as myself have made. As the enclosed photocopies of my February and July 2014 bills shows, in the last year before I installed my solar panels my winter bills barely topped \$20 per month. Currently I am providing TEP with electricity during the Winter and Spring, yet they want to charge me the same as if they were still providing it to me.

Tucson Electric's proposal is a blatant effort to maintain their monopoly by discouraging customers from investing in renewable energy, and penalizing those who have. This is also counterproductive to the goals of the Paris Climate summit, as well as other efforts to address climate change, pollution and natural resource conservation.

As an electricity consumer and producer, it sickens me that TEP would put their greed for profit not only before public health but even the health of our planet. Dispersed solar power generation will protect the environment from the whims of this monopoly.

The Corporation Commission was created precisely to restrain monopolistic practices such as this, and I urge you to refuse Tucson Electric's proposal. The Arizona Corporation Commission must discipline this irresponsible and greedy monopoly, and thereby protect present and encourage future solar owners.

Respectfully,

Laura Tobili
