To whom it may Concern;

You will be setting precedents for the state of Arizona when you evaluate their proposal. Your statement will say whether or not Arizona is in total support and commitment to green energy. The second precedent states Arizona's stand on discrimination. Both of these will effect all utility companies in the state.

My only question is what is the justification and dire need to raise any fees? Is this truly a need or is it a dream that we all have?

Please seriously consider your stance on this issue. Many will be effected and in serious financial strain.

Sincerely,

Mary Anne Gallew
