Subject: Value of Solar

Docket # E-000005-14-0023

Dear Chairman,

It is important that you do not let the needs and desires of the big money solar industry continue to force unfair rates and continue the subsidization of solar customers at the expense of non-solar customers. The powerful solar lobby has brought in out-of-state money, lies, and half-truths to defend their own economic future.

We want rates that are fair to the non-solar customers as well as the solar customers. It is not FAIR to continue with the rates paid to solar customers for their excess generation nor is the exchange of power fair. The 1.5 % of rooftop solar in our utility will continue to operate on the backs on non-solar customers and pass on the uncollected costs from the rooftop solar users to the 98.5% of the non-solar customers.

Continuing with these subsidies to rooftop solar customers is not fair.

Sincerely,

Gary Fiser

Dear Chairman,

It is important that you do not let the needs and desires of the big money solar industry continue to force unfair rates and continue the subsidization of solar customers at the expense of non-solar customers. The powerful solar lobby has brought in out-of-state money, lies, and half-truths to defend their own economic future. A system that forces electrical distribution companies to buy power at retail rates is not sustainable.

We want rates that are fair to the non-solar customers as well as the solar customers. It is not FAIR to continue with the rates paid to solar customers for their excess generation nor is the exchange of power fair. The 1.5 % of rooftop solar in our utility will continue to operate on the backs on non-solar customers and pass on the uncollected costs from the rooftop solar users to the 98.5% of the non-solar customers.

Continuing with these subsidies to rooftop solar customers is not fair.
