Nature Of Opinion

Docket Number: E-04204A-15-0142 **Docket Position:** Against

I am adamantly against a change to net metering and a demand charge for any customer. If the commission deems a change to net metering is warranted, I would ask the commission to include similar language APS used in the recent rate increase request: "Existing solar customers will be grandfathered under the net metering rules in place at the time of their agreement. The rules would remain for 25 years and stay with the property even if the customer moves. Additionally, customers would be grandfathered under the current rules if their completed application for rooftop solar is received by UES by (date the commission approves the rate increase request) and installed within 180 days." UES's effort to back date the grandfather clause to June 1, 2015 is unacceptable. Please don't allow customers who have installed rooftop solar with good intentions and reasonable expectations to be penalized by UES. I do not want to be caught in the middle of the battle between solar companies/installers and UES. Respectfully Monte McCue <<< REDACTED >>> Lake Havasu City, AZ
