Nature Of Opinion

Docket Number: E-01345A-16-0036 Docket Position: Against

APS should not be allowed any rate increase. It's profit levels are more than adequate. Given the technological advances of the past 50 years, electricity should cost less to produce. If APS had to compete for customers, it would be decreasing rates and improving efficiencies. We, the consumers, should not be penalized for APS' failure to operate efficiently. I'm sure the Commissioners don't need to be reminded that their responsibility is to the citizens of Arizona, not to Corporate profits. Since private solar installations are the closest thing to competition in the electrical utility field, they should be encouraged, not penalized. We, my wife and I, do not have solar panels, but we would if we could afford them.
