AZ CORP COMMISSION
DOCKET CONTROL

Commissioners,

Since your decision several years ago to have APS have 15% of it's energy production be from non-carbon producing sources by 2025, that company, once they attained that goal very early on, has been trying to crush the solar industry in this state.

We, the solar investors, were duped into believing from your advertising that we would benefit from lower rates if we went solar. Now that solar has taken off in this state, APS has put forth many rate cases that would basically nullify our investments.

The latest tactic by APS, ie, dark money and the election of APS friendly commissioners plus the delaying of the last rate case until these commissioners were seated, continues the saga. Now that they have the commission fixed in their favor, we have a new rate case that will cost the customers dearly on their bills, and make all those who invested in solar to loose their investments.

No problem, APS says, I will be grandfathered in for 20 years. That is a downright lie. APS is well aware of the ACC decision to do away with grandfathering in the next rate case.

The following is how the ACC will un-grandfather us in the future and be able to raise our rate again. E-01345A-13-0248, Page 21

“If DG customers’ rates were frozen, they would not be able to receive benefits (if any) of future changes or rate structures. Therefore, Staff clarifies that its use of the term “grandfather” means that the status quo for existing DG customers should be preserved until such time as the Commission considers this issue in APS’s next rate case or in other future orders of the Commission.”

Thank you ACC for making it so I can reap the benefits (if any) of future changes and rate structures. Tell me of one rate case that you passed that saved me money.

The FBI is investigating the APS and ACC for illegal funding of campaigns, but APS is continuing with the help of ACC it's new rate case.

This case has not even been decided on yet by the ACC, yet APS is out in Sun City on 14 Jun 16 briefing the residents on their new rates.

Pretty sure of themselves or just know that dark money talks. The fix is in.

This entire rate case should be cancelled until such time as the FBI investigation has reached a conclusion.
