Subject: I oppose UNS's proposal, regarding Docket# E-04204A-15-0142

Dear Chairman Little,

We need to be moving rapidly towards renewable energy sources and stop using fossil fuels. The future of our grandchildren depends on it. You can start diversifying, moving towards solar, wind, geothermal and other energy sources. Please do it now.

Sincerely,

Susan Sanders

Dear Chairman Little,

Arizona has the opportunity to set the example within The USA & The World for Solar & wind Energy What better way to bring Green Businesses here and keep Arizona green .We moved from Phoenix after a summer of \$ 500.plus bills in the summer to Kingman because its a small town with affordable Utilities Now you have a Company from Canada no less wanting to raise rates and stifle Solar in a state taht gets more sunshine than Florida ,Where we thought about retiring to .We WILL move if nothing is done to make Solar a priority to NM that also has much to offer including Sunshine and affordable Utilities

Sincerely,

Barbara Cannon

Subject: I oppose UNS's proposal to restrict Rooftop Solar production.

Dear Chairman Little,

Why is it that Arizona is so opposed to solar energy? Instead of putting money into researching more efficient, cheaper renewable energy sources in this most solar-rich of states, Arizona seems intent on killing it and relying on imports of fossil fuels. If Arizona were TRULY looking to attract innovation and money into this state, they be promoting solar energy and the means tot store it for round the clock usage. Surely that is the future of energy production and consumption?

Sincerely,

Paul Bradley

Dear Chairman Little,

We understand that the Arizona Corporation Commission is a creation of ALEC. It is an anti-democratic establishment that allows corporations to directly write legislation. When corporations are allowed to write special laws that favor their own business they are undermining the free market and destroying new innovation and opportunity for new entrepreneurs. ACC, ALEC and TPP are the death of the free market.

Subject: I oppose UNS's proposal, regarding Docket# E-04204A-15-0142

Dear Chairman Little,

Solar Power is a choice that many people make to help reduce our reliance on Fossil Fuels. Whether you believe or do not believe in Climate change is irrelevant. People should have the right to buy and add solar panels to their home without having unfair fees and penalties hit them.

It also important to note that net metering saves the power company a great deal. As I overproduce a great amount of energy during my "on peak" hours. The Power company buys this at the end of the year for Pennies on the dollar compared to what I would pay for that same amount of energy. That, coupled with the fees I already pay seem like a fair plan.

Keep us as is and do not kill the Solar industry. Solar means jobs and less reliance on fossil fuels - both of which are important for the well being and security of our state and America.

Dear Chairman Little,

APS is doing everything in it's power to stop solar. We had solar panels installed over a month ago and APS has delayed hook up to last possible opportunity. Some one needs to call them t account. The President is calling for utility companies to cooperate and yet they continue oppose solar. Their billions in profits are apparently not enough. Now they want to punish solar users for using a cleaner, cheaper power source. Please put a stop to this abuse of power.

Sincerely,

Richard Frisbie

Subject: I oppose UNS's proposal, regarding Docket# E-04204A-15-0142

Dear Chairman Little,

I oppose UNS's proposal, regarding Docket# E-04204A-15-0142.

This looks suspiciously familiar to many Alec written initiatives.

Residential demand charges discourage energy conservation, efficiency and will be a disincentive to installing solar. We need cleaner energy alternatives and to force customers to choose dirty energy over cleaner solar to avoid demand charges is just another way Oil and Nuclear firms undermine clean energy initiatives.

Demand charges can unfairly saddle customers who use little energy with high bills, based solely on infrequent usage spikes. They may have guests for the weekend, or have family staying awhile, or building a new addition to the home.

Consumer watchdogs and clean energy advocates are also concerned about bills of this nature.

This proposal is disastrous for Arizona. Please do not let it pass.

Dear Chairman Little,

To all who think it is their right to own the sun. STOP!! ☐ Your greedy ploys to charge people for what God gives us. I believe that every house in especially Arizona should have solar. The sun shines here mostly all the time. Just makes sense. I'm sick of utility companies wringing our pocketbooks for every dime the people have. People can't afford your continued taking from us. In the summer we couldn't stay alive without air conditioning. And for that you want to punish the consumer. Clean air as in solar is a must for the betterment of our world. Wake up and wise up. Instead of raping and dirtying our world.

Sincerely,

Victoria Hernandez
