Attachment	Summary of Monthly Bill Impacts With and Without Energy Efficiency Enabling Provision Adjustments by Sector and Rate Schedule	

# **SOUTHWEST GAS CORPORATION**

---

## **I. INTRODUCTION**

---

Southwest Gas Corporation (Southwest Gas or the Company) hereby submits its 2016 second quarter report on the performance of the Energy Efficiency Enabling Provision (EEP).

In Decision No. 72723, the Arizona Corporation Commission (Commission) authorized Southwest Gas to implement the EEP. The EEP contains two components, a monthly weather adjustment and an annual non-weather component to ensure the Company recovers its Commission-authorized revenue per customer.

The weather component adjusts customer bills when actual weather during the winter months (November – April) varies from the normalized weather used in the development of authorized rates. The annual component tracks the non-weather differences between the Company’s authorized revenues per customer and its actual revenues per customer, including a process to recover under-collections from and return over-collections to customers on an annual basis. The combination of these two components results in the Company recovering its Commission-authorized revenue per customer – no more, no less.

The monthly weather adjustment applies to customer bills rendered from November 1 through April 30. Southwest Gas’ customers experienced weather during April 2016 that was approximately 92 percent (Phoenix) and 55 percent (Tucson) warmer overall than the normalized weather used to develop currently effective rates. While a number of customers received bill adjustments consistent with warmer-than-normal weather, customers in billing cycles that experienced colder-than-normal weather received bill credits.

For the quarter, customers received an average credit of \$0.76 for the annual non-weather component of the EEP, which became effective January 1, 2016.

---

## **II. DISCUSSION**

---

This report is for the quarterly period April 1, 2016 through June 30, 2016. Bill analyses have been prepared by residential and non-residential sectors and by rate schedule. The rate schedules included in the residential sector are Single-Family Residential (Schedule No. G-5), Multi-Family Residential (Schedule No. G-6), Single-Family Low Income Residential (Schedule No. G-10), and Multi-Family Low Income Residential (Schedule No. G-11). The rate schedules included in the non-residential sector are Small General Service (Schedule No. G-25(S)), Medium General Service (Schedule No. G-25(M)), Large-1 General Service (Schedule No. G-25(L1)), and Large-2 General Service (Schedule No. G-25(L2)).

As described in the previous section, the EEP contains two components, a monthly weather adjustment and an annual non-weather component to ensure the Company only recovers its Commission-authorized revenue per customer. The monthly weather adjustment helps stabilize customer bills by mitigating the “peaks and valleys” that abnormal weather can have on customer bills. The annual non-weather component compares authorized revenues and actual revenues and recovers or returns differences between authorized and actual revenues in a per therm rate adjustment. In April 2015, Southwest Gas filed an application with the Commission seeking to return a deferred credit balance in the non-weather revenue component of approximately \$22 million to customers. The application was approved in December 2015 (Decision No. 75356) and a credit of \$0.05058 per therm became effective January 1, 2016. During this reporting period, single-family residential customers received the benefit of an average credit of \$0.76 associated with the non-weather annual component of the EEP.

Table 1 summarizes the second quarter bill impacts for the residential and non-residential sectors. The average EEP adjustments in this reporting period were consistent with warmer-than-normal weather, which were offset by the credit to customers for the non-weather component of the EEP.

Table 1- Average Bill by Sector

	<u>W/EEP Adjustment</u>	<u>W/O EEP Adjustment</u>	<u>Difference</u>
Residential Sector	\$ 26.17	\$ 26.30	\$ (0.13)
Non-Residential Sector	\$ 296.29	\$ 310.73	\$ (14.44)

Table 2 summarizes the results for the 2016 second quarter for each customer class included in the EEP.

Table 2- Average Bill by Customer Class

	<u>W/EEP Adjustment</u>	<u>W/O EEP Adjustment</u>	<u>Difference</u>
Single-Family Residential	\$ 26.67	\$ 26.79	\$ (0.12)
Single-Family Low Income	\$ 19.93	\$ 20.05	\$ (0.12)
Multi-Family Residential	\$ 20.57	\$ 20.91	\$ (0.34)
Multi-Family Low Income	\$ 18.00	\$ 18.26	\$ (0.26)
Small General Service	\$ 39.29	\$ 39.43	\$ (0.14)
Medium General Service	\$ 199.16	\$ 207.28	\$ (8.12)
Large-1 General Service	\$ 937.75	\$ 987.82	\$ (50.07)
Large-2 General Service	\$ 4,417.87	\$ 4,703.89	\$ (286.02)

The Attachment contains schedules showing the detail of the differences between average bills with the EEP adjustment and average bills without the EEP adjustment for residential/non-residential sectors and for each rate schedule for the quarter and by month for April, May and June 2016.

---

### **III. SUMMARY**

---

The EEP continues to perform as intended. Since January 2012 when the monthly weather adjustment was first implemented, the monthly weather adjustment has financially protected both customers and the Company. The weather adjustment stabilizes customer bills by providing customers timely relief from colder-than-normal weather when their natural gas bills are the highest, and upward adjustments to bills when the weather is warmer than normal and bills are the lowest. The annual non-weather component further ensures the Company only recovers the Commission-authorized revenue per customer – no more, no less. Customers are currently experiencing the benefit of the non-weather component as the deferred balance is refunded through rates.
