### **INSERT** Findings of Fact:

"79. It is reasonable to provide options to solar DG customers that also benefit ratepayers who choose not to employ solar. Following the structure of RUCO's declining RPS Credit Option, a fixed-bill credit mechanism can be adaptable to the outcome of the Value of Solar docket. Therefore, its implementation now will benefit solar DG adopters and non-solar adopters. Until the 2017 REST Implementation Plan decision later in 2016, or the outcome of the Value of Solar docket, the credit rate and decline schedule shall follow the figures in RUCO's proposal. In addition, solar customers may select whether the bill credit applies to all solar production or just solar exports. However, there will be no guarantee of the future offset value on production not compensated through the bill credit mechanism. Parties are also requested to address the long-term feasibility of this option in phase two of this proceeding."
