Subject: E-01933A-15-0322 - I oppose TEP's demand charge and elimination of nem

Dear Arizona Corporation Commission,

This message is to request that you reject TEP's attempt to monopolize renewable energy by crippling the D.G. options of it's customers. Elimination of net metering and imposing demand charges is an attempt to punish customers who want to save a few monthly dollars in a time when the cost of almost everything is going up. For many, this savings is essential. Wages are static, retirement looms on the horizon. We could save a little, do it in a way that benefits everyone, and DG is truly the right thing to do.

I enthusiastically ask you to be leaders in the future of Arizona. Let's show Arizona, America, and the World that Arizona lives and can indeed thrive in the 21st century.

I appreciate the opportunity to express my opinion and sincerely hope you consider it before rendering your decision.

Sincerely,

Dana and Robin Cude.

Dear Arizona Corporation Commission,

.The ACC should not take action that makes it difficult to install and use home solar panels. They help the environment and are a green source of energy. Solar should remain an alternate source of electricity for homeowners in Ariz. There has to be a middle of the road solution. The ACC must represent the consumer, not million dollar corporations that are granted essentially competition-free areas in the State. To increase fees (demand charges & elimination of net metering) beyond a reasonable amount is wrong. Yes, the people with solar panels should have to pay a FAIR share of the distribution system, but please don't allow increases for any customers that are unreasonable--TEP needs to be successful, but should not be allowed to hike rates and cut solar benefits more than absolutely needed .

Dear Arizona Corporation Commission,

.We urge the Arizona Corporation Commission to reject TEP's proposal. Arizona can and should be a leader in encouraging solar energy and the growing solar industry. Demand charges and the elimination of net metering will have a significant negative effect on the growing solar market in Arizona.

Thank you for your consideration.

Dear Arizona Corporation Commission,

Please do not accept TEP's proposal to raise demand charges, making solar less affordable at a time that it has become more so. Arizona should be an example of alternative energy, not an example of backwards public policy.

Dear Arizona Corporation Commission,

.No additional charges for solar! No add on rates for any household customers! Your proposal will sabotage solar in Tucson and take away jobs. There is no data to justify a rate hike. It would only sabotage our ability to save on solar. Also your roof top solar to customers is really not a substantial savings.

Dear Arizona Corporation Commission,

.It is INSANE to discourage the excitement Arizonans feel to be helping the environment by switching to CLEAN ENERY SOURCES!!!! TEP SHOULD BE FIGURING OUT A WAY TO HELP THIS MOVEMENT and SELL THE EXTRA ENERY GENERATED to other companies and states. Empty dams do not generate electricity....POSOTION YOURSELF!

Subject: E-01933A-15-0322 - I oppose TEP's demand charge and elimination of nem

Dear Arizona Corporation Commission,

TEP needs to stop asking for handouts on the backs of customers who want to use solar energy. They use dirty fossil fuels which will someday be gone so we need to use renewable energy. Arizona can be an example of helping to solve energy needs by promoting solar power. I am a proud owner of solar panels (cost of \$20,000) that provide almost all of my solar needs - and pay TEP about \$18 per month for being connected to them. Please don't let TEP take advantage of customers and think of our future generations. Energy companies like TEP are greedy and need to be stopped by the ACC for an unfair rate increase.

Thanks
Martie Fankhauser
