INSERT:

DOCKETED BY

As all of the parties acknowledge, the REST Rules are very clear regarding the relationship between location of distributed generation (i.e., customer-sited property) and the carve-out. It would be premature to waive the rules in this instance without a fuller investigation into what the impact would be of severing that relationship in this case and others. Therefore, we direct all parties in this case to address this issue in Chairman Little's Docket (the purpose of which is to investigate the carve-out, among other issues): Docket E-00000Q-16-0289 ("An Examination into the Modernization and Expansion of the Arizona Renewable Energy Standard and Tariff") by November 30, 2016.

DELETE Page 37, lines 20 through 23, and **INSERT**:

5. The Commission cannot conclude that TEP's RCS proposal is in the public interest at the present time but reserves the right to make that determination in Phase 2 of the Rate Case after parties have addressed the implications of allowing a utility-sited RCS program to count toward the Residential DG carve out.

DELETE Page 39, lines 1 through 4.

**** RENUMBER TO CONFORM, ADD APPROPRIATE ORDERING PARAGRAPHS (IF NECESSARY), AND MAKE ALL OTHER CONFORMING CHANGES.**
