SECTION 5 - LOCAL EXCHANGE SERVICE

5.1 Inbound Calling Service

Inbound Calling Service (“ICS”) is a Direct Inward Dial (“DID”) voice grade equivalent (“VGE”) service used to connect the Customer’s equipment to the public switched telephone network for the transmission of voice, data, or video traffic. ICS allows Business End Users to designate an area in the Company’s End Office as the Business End User’s designated Premises (“Designated Premises”), subject to space availability. DID numbers and VGEs provided with ICS are subject to availability of DID numbers and the capacity of transmission facilities provisioned, respectively. (C)

When subscribing to ICS, Business End Users may select either ICS Rate Plan 1 or ICS Rate Plan 2. The specific requirements, monthly recurring charges (“MRCs”), and nonrecurring charges (“NRCs”) for each of these plans are provided below.

5.1.1 ICS Rate Plan 1

ICS Rate Plan 1 is only available to Business End Users with more than 2 million MOUs over DID facilities per billing period per account and requires a minimum of 200 VGEs.

With ICS Rate Plan 1, Company provided connections between the Company’s End Office and a Business End User’s Designated Premises are provisioned using scalable and burstable transmission facilities that are designed to accommodate a significant and fluctuating number of simultaneous DID calls to a Business End User during a billing period.

In provisioning ICS Rate Plan 1, the Company will endeavor to provide a sufficient quantity of: (i) DID numbers to the Business End User to accommodate peak inbound traffic the Business End User expects the Company will deliver to the Business End User during a billing period, and (ii) DID VGEs to accommodate peak inbound traffic the Business End User expects the Company will deliver to the Business End User during a billing period.
